Press Release

Subject: FCSI Completes another GE Smallworld 4.3 Upgrade for Laclede Electric

5/1/2015

We are pleased to announce the completion of the Smallworld™ 4.3 upgrade from version 4.2 for Laclede Electric Cooperative in Lebanon, MO.

Leveraging FCSI's Managed Services build scripts and code organization we were able to complete the 4.3 upgrade 1 week ahead of schedule. We successfully completed the roll out the Smallworld Core Spatial Technology release 4.3 to production last week with no interruption of service.

FCSI looks forward to continuing supporting Laclede Electric through our Managed Services for GE Smallworld. We are in discussions to add additional functionality and productivity improvements. Stop by our booth at the 2016 GE Digital Energy Americas Software Summit to learn more about these improvements.

Special thanks to Jesse Usow of Usow Consulting for the use of his deprecated method call finder.

About FCSI

FCSI does the impossible by providing innovated consulting, services, and solutions that use GE Smallworld™. We continually strive to increase the efficiency of our customer's GIS applications. FCSI is an authorized Solutions Partner for GE Energy.
